Ms. Larine Moore  
U.S. Department of Energy (FE-34)  
Office of Natural Gas Regulatory Activities, Office of Fossil Energy  
Forrestal Building, Room 3E-042  
1000 Independence Avenue SW.  
Washington, DC 20585

Dear Ms. Moore:

I am writing in regards to Cameron LNG (Sempra Energy)'s application seeking authority to export liquefied natural gas. The facility is located in my congressional district and I can attest first hand to the outstanding corporate citizenship of Sempra Global and Cameron LNG.

After the devastating 2005 storms, Sempra was there for the families and communities of Southwest Louisiana. They provided critical assets and support for the cleanup and restoration. More importantly, they stayed involved and reached out into the heart of our communities by helping restore schools, gymnasiums and community centers. Today, they continue to be part of the Southwest Louisiana family helping charities and efforts throughout the year.

Southwest Louisiana is home to some of the most important United States energy assets. I am proud of Sempra Global and Cameron LNG's role in that portfolio. We are fortunate to have them as an investor in our state and as an employer for nearly a decade.

I respectfully ask you provide every proper consideration to the Cameron LNG application. Thank you and I look forward to working with you in the future on important energy issues.

Sincerely,

Charles Boustany Jr., MD  
Member of Congress
