Larine Moore  
U.S. Department of Energy (FE-34)  
Office of Natural Gas Regulatory Activities, Office of Fossil Energy  
Forrestal Building, Room 3E-042  
1000 Independence Avenue SW.  
Washington, DC 20585

Dear Ms. Moore:

I am writing in support of Cameron LNG (Sempra Energy)'s application seeking authority to export liquefied natural gas from its facility located in Cameron Parish, Louisiana.

As you know, throughout my career, I have fought for Louisiana's energy industry because I believe that we can provide resources safely and efficiently. Sempra is a great example of that belief. Cameron LNG represents an investment by Sempra in an environmentally sound facility that also plays a key role in the world energy markets. I believe the expansion of Cameron LNG to include a liquefaction facility will produce similar results.

Sempra has made a point of being sensitive and caring of our fragile coastal ecosystem in Louisiana. Past and future efforts by the Cameron LNG facility will include creative public private partnerships that will result in restored much-needed wetlands in Southwest Louisiana.

Sempra has been an outstanding investor and employer in our state for nearly a decade. Their operations in Louisiana represent the very essence of what I believe is critical for our nation's energy security: progressive energy solutions produced safely and efficiently.

Please accept this letter as my office's strong encouragement for the prompt consideration of the Cameron LNG application.

With kind regards, I am,

Sincerely,

Mary Landrieu  
United States Senator
