Submitter Info

Comment:	Jordan Cove is an idea that needs to be stopped because it
-----------------	--

endangers the coastal communities of North Bend and Coos Bay. It is sponsored by the fossil fuel industry and it benefits Veresen, a Canadian company whose only interest is the profit they will make. How can our country okay a project that will be located near a earthquake subduction and tsunami zone. Veresen wants to build a workers' camp under the highway in Coos Bay. These are short term jobs that are not sustainable. The fact that they would create long term jobs is a distortion of this Canadian company. Any jobs of a significance will be few. Please, I hope that our federal agencies will do their due diligence and see through the hype and distortions of this fossil fuel company and those who have been bought by it. Please protect the common welfare of our coastal towns. Those of us who have lived for years in our communities beseech you to act in good conscience and respect for our future. Please deny this application on the grounds that this proposed project is not needed, severely and negatively affects landowners, our environment and endangers our public safety. This proposed project is not in the public's good. *🌐
