II. BACKGROUND

The exact legal name of the Applicant and its principal place of business is:

TransCanada Pipelines Limited
450 1st Street SW
Calgary, Alberta
TransCanada is a Canadian public company incorporated in 1951 by a Special Act of the Parliament of Canada and continued on June 1, 1979 under the Canada Business Corporations Act. All of the common shares in TransCanada are held by TransCanada Corporation. TransCanada Corporation is a holding company created under a plan of arrangement approved by TransCanada’s common shareholders on April 25, 2003 and subsequently by the Court of Queen’s Bench of Alberta, Canada. TransCanada is a leading North American energy company with a natural gas transmission network in Canada and the U.S. comprising over 41,000 miles of pipeline.

III. AUTHORIZATION REQUESTED

TransCanada was authorized by DOE/FE Order No. 795 on April 30, 1993 to import and export up to 1,405,000 Mcf/d of natural gas from and to Canada beginning on April 30, 1993 and extending through November 1, 2005. Order 795-A, issued August 16, 1999, authorized an increase in volume to 1,717,000 Mcf/d, and extended through November 1, 2005. Upon the expiry of Order No. 795 and 795-A, and the underlying contracts, TransCanada renegotiated the volumes into multiple contracts for varying terms. Order DOE/FE Order No. 2169 authorized the import and export of up to 78.8 MMcf of natural gas per day, from November 1, 2005 through October 31, 2009, as detailed in the filed Contract FT4762. Contract FT4762 has been renegotiated and TransCanada respectfully requests a new long term authorization.

In this application, TransCanada requests a long term authorization to import up to 0.3585 Bcf/d for a period of three years commencing November 1, 2009 and extending through October 31, 2012, as per Contract FT11701. The gas will enter the United States at the interconnection between the TransCanada PipeLines system and the Great Lakes Gas Transmission System (“Great Lakes”) at a point near Emerson, Manitoba and leave the United States at the international border near St. Clair, Michigan. The import and export activities will serve TransCanada Mainline Pipeline System shippers in Ontario, Quebec and downstream shippers in the U.S. In a separate application also relating to Contract

\[1\] See Transportation Service Agreement FT11701, attached as Exhibit B.
FT11701, TransCanada is requesting authorization to conduct backhaul transportation for the winter periods.

IV. PUBLIC INTEREST

TransCanada's proposed import and export of natural gas continues to be consistent with the public interest. Section 3(c) of the NGA provides that imports from, or exports to, countries that have in effect a Free Trade Agreement with the United States requiring national treatment for trade in natural gas "shall be deemed to be consistent with the public interest and applications for importation or exportation shall be granted without modification or delay."2 The United States and Canada are parties to a Free Trade Agreement that requires each party to provide national treatment to the goods of the other party. Therefore, imports from Canada and exports to Canada, as proposed herein, are deemed consistent with the public interest.

V. ENVIRONMENTAL IMPACT

No new facilities will be constructed in the United States for the proposed importation and exportation of natural gas. Consequently, granting this application will not be a federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act, 42 U.S.C. § 4321, et seq. Therefore, an environmental impact statement or environmental assessment is not required.

VI. REPORTING REQUIREMENTS

With respect to all imports and exports made pursuant to the authorization requested herein, TransCanada will undertake to file with the DOE/FE within 30 days following each calendar month a report indicating whether imports and/or exports have been made, describing the country of origin, point(s) of entry or exit, volumes delivered/exported and the country of destination, average price, the gas transporter(s), the markets served and the

estimated duration of the supply contract as outlined in 73 Fed. Reg. 6943 (February 6, 2008).

VII. CONCLUSION

WHEREFORE, for the foregoing reasons TransCanada respectfully requests that its authorization be granted to import and export up to a total of 0.3585 Bcf/d of natural gas from and to Canada extending from November 1, 2009 through October 31, 2012.

Respectfully submitted,
