Re: Carib Energy (USA) LLC, FE Docket No. 11-141-LNG
Amendment to Application of Carib Energy (USA) LLC For Long-Term Authorization To Export Liquefied Natural Gas To Non-Free Trade Agreement Countries

Dear Mr. Anderson:

On October 20, 2011, Carib Energy (USA) LLC (“Carib”) filed an Application for Long-Term Authorization to Export Liquefied Natural Gas to Non-Free Trade Agreement Countries (“Original Non-FTA Application”). The Non-FTA Application is currently pending in Docket No. 11-141-LNG. Based on developments that have taken place during the period of time the Original Non-FTA Application has been pending, Carib has certain updates to the information provided in the Application, as further described below, and accordingly is submitting this amendment in accordance with 10 C.F.R. § 590.204(a). Capitalized terms used but not defined in this amendment have the meanings set forth in the Original Non-FTA Application.

The requested amendments are as follows:

Facility: In the Original Non-FTA Application, the name of the Facility from which Carib intended to obtain LNG for export was not made public. Because that Facility had not previously been used to deliver LNG for export, it was unclear whether providing LNG to Carib would result in a change to its regulatory status. Carib has since determined that it will not take delivery from the original Facility, and therefore wishes to substitute a new Facility in its Application. The new Facility is the Floridian Natural Gas Storage Company, LLC facility being developed in Martin County, Florida (“Floridian”). Floridian’s Certificate of Public Convenience and Necessity was granted by the FERC in Docket No. CP08-13-000 on August 29, 2008, and a

requested amendment was approved in Docket No. CP-12-100-000 on August 31, 2012. The Facility is expected to begin operation in mid- to late 2014. No modifications to the Facility would be required in order for Carib to take delivery of LNG from the Facility.

Supplier: In the Original Non-FTA Application, the name of the supplier who would be selling natural gas to Carib was not made public. Because the original supplier had ties to the original Facility, a change in Facility resulted in a change in supplier, as well. Carib’s new supplier will be BP Energy Company (“BPEC”). Carib and BPEC intend to enter into an agreement for Carib’s firm purchase of LNG from BPEC via truck loading delivery at the Floridian Facility. A copy of a letter of from BPEC further describing the parties’ intent is attached hereto as Attachment A. Carib will file the final agreement with BPEC under seal following its execution. As noted in the Original Non-FTA Application, the DOE/FE has previously found this commitment conforms to the requirements of 10 C.F.R. § 590.202(b).

Volume: Under this new arrangement, the delivered volumes will exceed those contemplated in the original transaction. Accordingly, Carib is amending its requested authorization to up to 600,000 LNG gallons per day, or approximately 0.06 bcf/day.

The remainder of the Original Non-FTA Application remains unchanged. The LNG will be transported in the same manner, and exported from the same ports, as described in the Original Non-FTA Application. The public interest analysis, as set forth on pages 7 through 14 of the Original Non-FTA Application, remains the same. And, even with the requested increase in authorized gas export volumes, the amount of LNG Carib is seeking to export remain very small in comparison to the authorizations sought in other pending export application.

Please do not hesitate to contact me if you have any further questions relating to this requested amendment.

Respectfully submitted,

Michael A. Stosser

BP Energy Company Letter
November 20, 2012

Mr. Greg Buffington, President
Carib Energy (USA) LLC
11947 NW 37th Street
Coral Springs, FL 33065

Subject: LNG Purchase by Carib Energy (USA) LLC

Dear Mr. Buffington:

This is to summarize our activities associated with the proposed purchase of LNG supply by Carib Energy (USA) LLC (“Carib”) from BP Energy Company (“BPEC”).

The purchase of LNG supply from BPEC would be under a long term contract providing for the firm purchase of LNG via truck loading delivery to Carib at the Floridiana Natural Gas Storage Company, LLC (“FGS”) facility being developed under its FERC CP 16N in Martin County, FL. The contract term would be for ten years with contract extension provisions, beginning with the commercial in-service date of FGS projected to be in late 2014. The contract quantity would be for up to 600,000 LNG gallons per day.

It is our understanding that Carib intends to utilize the LNG supplies from BPEC for its domestic and export markets.

If there are questions, please do not hesitate to contact me. We appreciate the opportunity to work with Carib on this activity.

Best Regards,

David Fairley
