On June 6, 2012, the Office of Fossil Energy at the Department of Energy posted in the Federal Register a Notice of receipt of an application (Application), filed on March 23, 2012, by Jordan Cove Energy Project, L.P. (Jordan Cove), requesting long-term, multi-contract authorization to export as liquefied natural gas (LNG) both natural gas produced domestically in the United States and natural gas produced in Canada and imported into the United States, in an amount up to the equivalent of 292 billion cubic feet (Bcf) of natural gas per year, 0.8 Bcf per day (Bcf/d), over a 25-year period, commencing on the earlier of the date of first export or seven years from the date the requested authorization is granted. The LNG would be exported from the proposed LNG terminal to be located on the North Spit of Coos Bay in Coos County, Oregon, to any country (1) with which the United States does not have a free trade agreement (FTA) requiring national treatment for trade in natural gas, (2) which has developed or in the future develops the capacity to import LNG via ocean-going carrier, and (3) with which trade is not prohibited by U.S. law or policy. Jordan Cove is requesting this authorization to export LNG both on its own behalf and as agent for other parties who hold title to the LNG at the point of export. The Application was filed under section 3 of the Natural Gas Act (NGA).

Landowners United is a grassroots organization of Landowners who will be directly impacted by the Pacific Connector Gas Pipeline portion of the proposed Jordan Cove Energy Project. We represent hundreds of landowners across Southern Oregon who oppose the Pacific Connector gas pipeline and the taking of private property, potentially by eminent domain, for the benefit of a foreign owned and operated energy company.

Landowners United formed during the FERC Prefiling phase of the proposed Jordan Cove Energy / Pacific Connector LNG export project. Our members live, work, have businesses, recreate and socialize in areas that would be negatively impacted by the Pacific Connector Gas Pipeline.

Landowners United declares that a liquefied natural gas (LNG) export terminal, storage tanks and liquefaction facility is not a well conceived or appropriate industry for the Southern Oregon Coast and that LNG represents an unacceptable risk to the people of the State of Oregon. For the safety, security, and well being of the citizens of our communities, Landowners United ask the U.S. Department of...
Energy to immediately take action to stop the Jordan Cove LNG Export terminal, storage tanks and liquefaction facility proposed for the North Spit of Coos Bay and the 230 mile, 36 inch Pacific Connector natural gas pipeline to the California border. We ask the U. S. Department of Energy to not approve the Jordan Cove Energy Project’s application to Export LNG to non-free trade agreement nations as this would not be in the best interest of landowners or the public at large. We believe that exporting natural gas to non-free trade agreement countries will do nothing but drive the price of domestically used gas up to the detriment of the U. S. economy and hard working Americans. Further details as to our reasons for this are spelled out in comments submitted into this proceeding by the Citizens Against LNG.

In order to protect the interest of our members Landowners United moves to intervene in this proceeding, pursuant to 10 C.F.R. § 590.303(b).

In addition, Landowners United would like to go on record as being in full support of the Citizens Against LNG and Sierra club's motion to intervene, protest and comments that are also being filed in this proceeding.
