Subject: No Fracking!!

Do not allow export of LNG. First, we need to pull back from fossil fuel's poisoning the earth and its environment. Fracking sends water out of the water cycle while contaminating the balance of water used.

Second we cannot destroy our land to provide exports to another country. We all share the same room: earth.

If a person closes off a room and turns on the gas and/or exhaust it is called suicide. What ARE we doing. This is a closed system we live in and the balance between plant life and animal life is being drastically upset. "Cleanliness is next to Godliness."

We need to Clean Our Room! LNG exports No, No, No.
