

Secretary Steven Chu
2012 LNG Export Study
U.S. Department of Energy (FE-34)
Office of Natural Gas Regulatory Activities
Office of Fossil Energy
P.O. Box 44375
Washington, DC 20026-4375

Dear Secretary Chu,

Exporting liquefied natural gas (LNG) is a great opportunity for America. It will create thousands of jobs and bring about a better economy in many areas. This is a chance to really help our country.

There is no drilling being done here in The Woodlands area of Texas, but I can personally attest to the fact that the oil and gas industries are doing quite well. Ten years ago, I moved here and went to work at Anadarko. As an IT specialist, I am not directly involved in the work out in the field. However, I help in getting the information out to the workers.

Authorization of LNG exports would not only help my company, but also so many others would benefit as well. I believe the studies published by the Department of Energy accurately show how much this initiative will bolster existing industries and jump-start our economy, despite Ed Markey's letter to the contrary. It will create jobs across the country and have an enormous and positive impact on the economy. Therefore, I ask for your support of LNG exportation.

Best regards,

Christie Bailey
