

Christine Farrell

Secretary Steven Chu
2012 LNG Export Study
U.S. Department of Energy (FE-34)
Office of Natural Gas Regulatory Activities
Office of Fossil Energy
P.O. Box 44375
Washington, DC 20026-4375

Dear Secretary Chu-

As a Republican, I am supportive of the export of liquefied natural gas (LNG) abroad. Despite the opinion of Representative Markey, I am in favor of anything that will create jobs and revenue for our country. That is why I urge you to approve the improvements to the natural gas import facilities to allow for exportation of LNG.

Living in a rural area on ten acres, I am surrounded mostly by farmers. Our local economy has remained fairly stable. My husband and I both work and have been very busy lately. However, I do know quite a few people in other parts of the state that are not having an easy time because of the unfavorable job market.

We do have some natural gas reserves in parts of Pennsylvania, and it is my hope that these resources will be developed. We should do everything in our power to keep the demand for natural gas high so that the people working in hydrofracking are able to keep busy. This means we need to export some of our surplus natural gas abroad. The project to upgrade the import facilities will help create revenue for the country and our state. Our roads are in bad shape and the state cannot afford to fix them at this time. This is the perfect solution to generate income in order to keep up with maintaining our infrastructure. Please approve the facility upgrades so we can start exporting.

Thank you for your service,

Christine Farrell
