Secretary Steven Chu
2012 LNG Export Study
U.S. Department of Energy (FE-34)
Office of Natural Gas Regulatory Activities
Office of Fossil Energy
P.O. Box 44375
Washington, DC 20026-4375

Dear Secretary Chu-

The exportation of liquefied natural gas (LNG) will flood the market with new jobs. I am urging you to approve the exportation of LNG in spite of opposition from Representative Markey of Massachusetts. This project will help the US economy exponentially and there is no reason to delay.

For the duration of my career, I have worked in the energy industry. Government regulations and restrictions have always been burdensome. I started out working at a coal-fired electric power plant and now I work in drafting for the natural gas industry. I went to college for drafting and I was able to find a job in my field which I have been doing for the past 12 years. Right now, the company I work for is functioning at minimum capacity and employs approximately 150 people. Our company stands to gain directly and tremendously from the exportation of LNG. We have given several quotes to build vessels for the Sabine Pass facility as soon as the upgrades are approved.

The economy in my area is flourishing because of oil and natural gas development. It would be nice to see the rest of the country follow suit by developing our natural resources to full capacity. Please approve LNG exports without further delay. America cannot afford to have these applications denied.

Thank you for your service,

Kevin Tubbleville
