SUMMARY

The Office of Oil and Gas Global Security and Supply, Office of Natural Gas Regulatory Activities prepares quarterly reports showing natural gas import and export activity. Companies are required, as a condition of their authorizations, to file monthly reports. This Natural Gas Import and Export Report is for the third quarter of 2009 (July through September).

Sections 1 and 2 contain the quarterly summary charts and tables. Section 3 contains the detailed transactions of all the imports and exports. The data in Section 3 is separated by long-term imports, long-term exports, short-term imports, and short-term exports. There is a table of contents for your convenience.

Third Quarter Highlights

Imports totaled 976.8 Bcf and exports totaled 238.8 Bcf, resulting in net imports of 738 Bcf. As usual, most of the imports came from Canada, comprising 88 percent of the total. Imports from Mexico made up less than one percent (0.6 percent) and LNG imports made up 11.4 percent of the total. As illustrated in the following tables, imports were up more than 10 percent compared to last quarter. This increase was due to a rise in Canadian imports (up 19%) and in spite of decreases in Mexican imports (down 33%) and LNG imports (down 28.6%). Average prices were down an average of 8.7 percent all around.

Exports were up 6.9 percent compared to last quarter. The increase was due to a growth in exports to Mexico (up 19.8%) and LNG exports to Japan (up 67%) and in spite of a decrease in exports to Canada (down 3%). As with imports, the majority of exports went to Canada, making up over 56 percent of the total. Exports to Mexico comprised nearly 40 percent and LNG exports comprised just over 4 percent of the total exports.

LNG imports were down in the third quarter compared to last quarter, but were up over 13 percent compared to the third quarter 2008. Forty cargos of LNG were imported. LNG import prices were down nearly 3 percent compared to last quarter and down almost 64 percent compared to the third quarter 2008. LNG exports were down 18.3 percent compared to the third quarter 2008.

Please note that the data in this Report is subject to revision. Revisions occur when companies submit late or corrected data after the Report has been published. The Quarterly Report is available on the Fossil Energy Web Site at <http://www.fe.doe.gov> (click on Natural Gas Regulation). We welcome questions or comments about this Report. Total Exports - 239 Bcf

- Over half of U.S. exports during the second quarter were sent to Canada.
- Mexico accounted for most of the remaining exports, and Japan, the United States' only vessel-borne LNG export customer during this quarter, accounted for about 4% of the total.
- LNG exports to Japan had the highest prices by far, followed by those to Canada. Average prices of gas exported to Mexico and Canada were fairly close.

Comparison of 3rd Quarter Imports with Previous & Year-Ago Quarters

- The total volume of third quarter imports was greater than in the second quarter of this year, and just below the volume for the third quarter of last year.

Comparison of 3rd Quarter Exports with Previous & Year-Ago Quarters

- The third quarter 2009 export volume was higher than both the second quarter of 2009 and the third quarter of 2008.

Imports from Canada by Entry Point

- Following a long-term trend, volumes of natural gas imported under short-term authorizations eclipsed volumes imported under long-term authorizations.
- Eastport, Idaho experienced the highest volume of imports, with almost 50% more than the next busiest import point (Port of Morgan).
- The five most active import points handled more than three-quarters of all imports to Canada during the third quarter.

Short-Term Imports from Mexico by Entry Point

- Imports from Mexico arrived in the U.S. through four entry points during the third quarter. The McAllen, Texas point experienced the largest volume of imports from Mexico, with nearly half the total. The Galvan Ranch, Texas point was responsible for only a small volume of imports.

Short-Term Exports to Canada by Exit Point

- St. Clair, Michigan continued to dominate other exit points, accounting for more than 85% of exports to Canada in the third quarter. Far fewer points handled exports as handled imports with Canada, consistent with historical experience.

Pipeline Exports to Mexico by Exit Point

*Very small volume is not shown due to rounding

- The U.S. exported natural gas to Mexico through a large number of exit points during the third quarter. Continuing a pattern, four points (Ogilby, California; Douglas, Arizona; Clint, Texas; and Rio Bravo, Texas) together accounted for nearly 90 percent of total Mexican exports. Only small volumes were exported at the other exit points.

- Two terminals – Elba Island and Everett – together accounted for about two-thirds of third quarter LNG imports.
- Three terminals received LNG cargos in all three months of the quarter.
