

## LIST OF FIGURES

<u>Figure</u>		<u>Page</u>
2.1-1	Location of the Proposed Kemper County IGCC Project Site	2-2
2.1-2	Topography of the Proposed Kemper County IGCC Project Site	2-3
2.1-3	Aerial Photograph of the Proposed Kemper County IGCC Project Site	2-4
2.1-4	Process Flow Diagram of Proposed Kemper County IGCC Project	2-5
2.1-6	Concept Rendering of the Proposed IGCC Project Facilities	2-7
2.1-5	Planned Arrangement of Equipment and Facilities on the Kemper County IGCC Project Site	2-8
2.1-7	Side View of a Gasifier	2-9
2.1-8	Typical Flare Derrick with a Single Flare	2-13
2.1-9	Conceptual Schematic of a Combined-Cycle System	2-13
2.2-2	Proposed Connected Actions in the Vicinity of Meridian	2-16
2.2-1	Locations of Proposed Connected Actions	2-17
2.2-3	2008 Aerial Photograph of Mine Study Area and Power Plant Site	2-18
2.2-4	Conceptual Life-of-Mine Plan for Liberty Fuels Mine	2-20
2.2-5	Design Details for H-Frame Transmission Line Structure	2-24
2.3-2	Initial Mining Area Water Management	2-30
2.3-3	Photograph of Diversion Channel at NACC's Red Hills Mine	2-31
2.3-4	Stages of Pipeline Construction	2-33
2.4-1	Typical Mining Sequence	2-36
2.5-1	Areas of Kemper County IGCC Project Site Potentially Impacted	2-54
2.5-2	Overall IGCC Plant Water Balance	2-55
2.7-1	Lignite Bearing Strata of Mississippi, Alabama, and Tennessee	2-73
2.7-2	Alternative Mine Plan "A"	2-80
2.7-3	Alternative Mine Plan "B"	2-82
2.7-4	Alternative Mine Plan "C"	2-83
3.3-1	5-year Wind Rose for Meridian Key Field Airport (1991 to 1995)	3-3

## LIST OF FIGURES

<u>Figure</u>		<u>Page</u>
3.3-2	Location of Ambient Air Quality Monitors	3-6
3.3-3	AQI Charts for Lauderdale County—2006 through 2008	3-9
3.3-4	Existing Emissions in Kemper and Lauderdale Counties (2001)	3-10
3.4-1	Surface Geology Map of Mississippi	3-12
3.4-2	Physiographic Provinces of Mississippi	3-15
3.4-3	Subsurface Structural Features of Mississippi	3-17
3.4-4	Regional Geologic Cross-Section	3-18
3.4-5	Location of Geologic Cross-Section A-A'	3-19
3.4-6	Shallow Stratigraphy in the Mine Study Area	3-22
3.4-7	Structural Contour Map on Top of Cretaceous	3-25
3.4-8	Structural Features of Mississippi	3-26
3.4-9	Tectonic Map near Project Area	3-27
3.4-10	Station Map for the Mid-America Region of the ANSS	3-29
3.5-1	Soils Distribution for the Proposed Project Area	3-34
3.5-2	Geographic Locations of Soil Map Units	3-36
3.6-1	Watershed Basins and Sub-Basins in the Project Area	3-44
3.6-2	Surface Waters in the Vicinity of the Proposed Power Plant and Mine Study Area	3-50
3.7-1	Hydrogeologic Cross-Section Schematic	3-59
3.7-2	Water Well Location and the Aquifers Used for Water Supply	3-61
3.7-3	Locations of Water Wells in the Mine Study Area and Surroundings	3-64
3.7-4	Locations of Springs in the Mine Study Area and Surroundings	3-65
3.7-5	Water Level Elevations	3-71
3.8-1	Vegetation/Land Use Types Identified Within the Power Plant Site	3-76
3.9-1	Stream Assessment Study Site Locations	3-127
3.9-2	Cluster Analysis for Sampling Sites	3-132

## LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
3.11-1 Spatial Distribution of Wetlands	3-145
3.12-1 Land Use	3-161
3.12-2 Land Use	3-163
3.13-1 Census Tracts within a 7-Mile Radius of the Proposed Plant Site	3-171
3.13-2 Native American Reservation Lands in the Vicinity of the Project Area	3-172
3.14-1 Road Map Showing Selected Traffic Volume Monitoring Locations	3-174
3.14-2 Selected Traffic Volume Monitoring Locations, Initial Lignite Coal Delivery Route	3-176
3.14-3 Airports and Railroads in the Vicinity of Proposed Kemper County IGCC Project Area	3-182
3.18-1 Listed Historic Places in the Project Counties	3-190
3.18-2 Front View of Goldman House	3-191
3.18-3 Potential Mining Area Boundary and Areas Surveyed	3-192
3.18-4 Chickachae Combed Vessel Fragment Recovered from Shovel Testing at Field Site Km002	3-195
3.19-1 Ambient Sound Survey Locations	3-205
3.20-1 The Electromagnetic Spectrum	3-208
3.20-2 Existing Electrical Transmission Lines	3-211
4.2-1 Massive Sand (Layer 5) Active Cell Extension toward the Southwest over the Site Proposed Wells Located Southwest of the Saltwater-Freshwater Interface	4-38
4.2-2 Predicted Drawdown in the Massive Sand (Layer 5) at the End of 40 Years of Pumping Based on 1.0 MGD Total Withdrawal from the Massive Sand	4-39
4.2-3 Vegetation/Land Use Impacts on the IGCC Power Plant Site	4-47
4.2-4 Impact of Mining Block E on Okatibbee Floodplain	4-67
4.2-5 Estimated Number of Emergency Department Visits with Asthma as First Diagnosis per 10,000 Population—Mississippi 2003 to 2005	4-85
4.2-6 Distribution of Traffic—Construction (a.m. Shift)	4-94
4.2-7 Distribution of Traffic—Operation (a.m. or p.m. Peak Hour)	4-97
4.2-8 Initial Lignite Coal Delivery Route Distribution of Traffic	4-99

## LIST OF FIGURES

<u>Figure</u>		<u>Page</u>
4.2-9	Sensitive Receiver Locations near Kemper County IGCC Plant	4-111
4.2-10	Maximum Sound Levels at the Kemper County IGCC Plant	4-112
4.2-11	Maximum Sound Levels from Surface Mining Operations and IGCC Power Plant Noise	4-114
4.4-1	Predicted Drawdown in the Massive Sand (Layer 5) at the End of 40 Years of Pumping Based on 6.5-MGD Total Withdrawal from the Massive Sand	4-133
6.2-1	DOE Actions in Eastern Mississippi	6-8
